

ABOUT BLUELION

Our Story

Toni and Alison met and worked together for over six years at a previous company. After years of successful collaboration, Alison and Toni knew there was a need for small businesses to have more customized HR and Operations support.

Both Alison and Toni recognize that small businesses make up a strong community and a strong economy. With this being the driving force, they decided to launch their own HR and Operations consulting business. Their goal was to provide small businesses with services that big businesses have to create growth and opportunity.
